

### **Abstract of the Disclosure**

To provide an image forming device using a generic image recording apparatus and a generic image reading apparatus, which can respond to customer needs. An image recording apparatus is provided inside a supporting table disposed on an upper surface of an image reading apparatus. A control unit is engaged to a rear side of the supporting table to function also as a reinforcing part of the rear side. The control unit can be changed to carry out control processing according to the combination of the image reading apparatus and the image recording apparatus, and the control unit can be replaced as necessary with another control board.
